OCR PAC Version 6.2

Automated Transaction Data Entry for Sage 300 ERP

NOBODY LIKES DATA ENTRY!

- Data entry is a chore. It's necessary, but it's costly and time consuming.
- Why can't Sage 300 ERP just read and enter the data from vendor invoices for you?
- OCR PAC will help you do this.
- What if the invoice was automatically stored with your Sage 300 ERP data so you could view it from Sage 300 ERP any time you needed to?
- The OCR PAC / eImagePac bundle makes this a reality.

OCR PAC WILL HELP IF YOU:

- Have better things to do than data entry
- Process Accounts Payable invoices
- Need to store documents electronically
- Have high volumes or time constraints
- Want to capture invoices quickly and accurately

FEATURES

- OCR PAC automates data entry for Sage 300 ERP Accounts Payable Invoices
- Processes invoice documents from an inbox folder or direct from any Twain compliant scanner
- Available bundled with Modulo Software's eImagePac for a total document management solution.
- OCR PAC is a tightly integrated Sage 300 ERP third party solution developed with the Sage 300 ERP Software Development Kit (SDK)
- Supports operation in the Sage 300 ERP Windows and Portal desktops and is available for all Sage 300 ERP editions and databases.

- Enhances existing Sage 300 ERP transaction windows which simplifies and streamlines user acceptance and training.
- OCR PAC supports the popular file format(s) that your organisation prefers – see below.
- Different documents can be processed with different file types and resolutions, even for invoices from the same Vendor.
- Uses standard Sage 300 ERP security settings. Sage 300 ERP users are assigned OCR PAC privileges to allow them to process documents, print reports etc.
